

**Office365 backup Powered by Keepit**  
**R59,99 per user monthly**

*Data in the cloud does need backing up too!*

*It's on this basis we have Partnered with Keepit to offer back-up on Office365 (Email, Tasks, Calendar, Contacts, Teams, in-place Archive, One Drive, SharePoint sites & more!)*

**Why would I need back-up if the data is in the Office365 cloud and has a Recycle Bin?**

The data in the cloud is safe and secure however Microsoft themselves recommend backup of Office365 data. We also need to protect from accidental deletion or overwriting.

**What about employees who use files occasionally, then realise they can't find them or may have deleted it?**

As Keepit retains data for 365 days as standard, you can easily go back and locate this data.

**Some of our 'long service' employees may have more than 1TB of data in Office365, what about them?**

In this case, you simply purchase an additional user license for every 1TB additional.

**Is it a requirement to sign up for ALL Employees?**

No, you can decide which employees you like to start with and later scale up, if needed!

**What about the skills and time needed to setup the backups?**

Argantic will setup everything for the first data ingestion which is typically done in a day.

**How often are files backed up and how does one initiate it?**

Back-ups are done daily and are fully automated. You also receive detailed health report.
